

CHEMISTRY OF THE SEXES

THE MALE vs. FEMALE BRAIN

"Women know when all you want is a glass of wine, nodding sympathy and a good whinge. Men offer a solution."

At a very early age and through the effects of both nature and nurture, "femininity" or "masculinity" is ingrained in an individual. Are male and female brains physically different, and what role do our hormones play? To what degree does society and our upbringing shape gender behaviour? Will men and women ever think alike?

With radio announcer Lizzy Lovette as MC, join us for our Young Garvan Forum to explore these deep-rooted issues that have been hotly debated in households for generations. Our expert panellists are from a variety of backgrounds including the worlds of medical research, psychology, education and social commentary.

Thursday 30 August
Garvan Institute, 384 Victoria St, Darlinghurst
Drinks and Canapés from 6.30pm
Forum commences at 7pm
Concludes at 8.30pm
Post-forum drinks at De Nom, 231 Oxford St, Darlinghurst

Tickets:
Young Garvan Patrons - Free
Adults - \$20
Students - \$15

Register securely online at www.garvan.org.au or phone Danielle Fischer on 9295 8108.
