Leaders in Science

Professor John E. J. Rasko AO

Professor, Sydney Medical School, University of Sydney, Head, Gene and Stem Cell Therapy Program, Centenary Institute, Head of Department, Cell & Molecular Therapies, Royal Prince Alfred Hospital

“Gene expression in blood cells: having your trifle and eating it too!”

MONDAY 16TH SEPTEMBER, 2013 | 12PM, NAB AUDITORIUM

HOST: Professor John Mattick

Professor Rasko is a clinical hematologist, pathologist and scientist with a productive track record in gene and stem cell therapy, experimental haematology and molecular biology. In over 140 publications he has made major contributions to the understanding of stem cells and haemopoiesis, gene transfer technologies, oncogenesis, human aminoacidurias and non-coding RNAs.
