Medical Oncologist, Royal Melbourne Hospital

“Using patient-derived xenografts to improve drug targeting in high grade serious ovarian cancer”

Monday 4th August, 2014 | 12PM, NAB AUDITORIUM

Host: Dr Alex Swarbrick

Clare Scott is a clinician scientist, treating patients with breast and ovarian cancer at the Royal Melbourne and Royal Women's Hospitals. She leads an ovarian cancer laboratory at the Walter and Eliza Hall Institute of Medical Research, focused on developing targeted therapies for ovarian cancer to change the current treatment paradigm of "one size fits all" for women with ovarian cancer. She has been awarded the Burnet Prize and the Cory Leadership Fellowship for Women in Science at WEHI and the Cancer Council Victoria Sir Edward Dunlop Fellowship.
