Prof Peter Vogt
The Scripps Research Institute

“MYC and the Non-coding Transcriptome”

Monday 9 November 2015 12:00PM, AUDITORIUM

HOST: PROF JOHN MATTICK

Peter Vogt was trained as a virologist at the Max-Planck-Institute in Germany and at the University of California in Berkeley. His work deals with retroviral replication and genetics, with viral and cellular oncogenes and with the identification of novel inhibitors of oncoproteins. He has held faculty positions at the University of Colorado, the University of Washington, the University of Southern California and is currently Professor at The Scripps Research Institute.
