

Garvan invites you to our free public seminar

Healthy Ageing

GARVAN
INSTITUTE

Breakthrough Medical Research

As we age, quality of life becomes all-important. We cannot stop the clock, but we can ensure we are equipped to meet the demands of ageing. This seminar will offer you the opportunity to hear the very latest research into the key issues you may face as you age.

Can you delay the ageing process?

Why is cancer so common in the elderly? What signs should I look out for?

Is it too late to start looking after the health of my bones?

What role do hormones play in the ageing process?

What are the effects of ageing on the circulatory system?

Join our expert panel of speakers to discuss cancer, osteoporosis, cardiology and our hormones.

Professor Ric Day - Professor of Clinical Pharmacology, UNSW Medicine, and St Vincent's Hospital Rheumatologist

Professor John Grygiel - Professor of Medicine & Senior Staff Specialist, St Vincent's Hospital

Associate Professor Diane Fatkin - Laboratory Head, Molecular Cardiology Program, Victor Chang Cardiac Research Institute; Senior Lecturer, UNSW

Dr Paul Baldock - Senior Research Officer, Bone & Mineral Program, Garvan Institute

Dr Paul Lee - Postgraduate Research Fellow, Pituitary Research Group

Sue Field - Public Trustee NSW Fellow in Elder Law

Wednesday 9th April 2008

10am - 12.30pm (doors open 9am)
